Art Unit: 1651

1. Receipt is acknowledged of the preliminary amendment filed December 2, 2003 for this application, which is a CIP of Serial Number 10/107,807, filed March 28, 2002, now abandoned.

2. Claims 1-23 are now present in this application drawn to the specific compound isolated from *Aspergillus Niger*, the method of making and using the compound.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention with respect to the deposit:

It is apparent that the deposit as noted in the specification:

A biologically pure culture of *Aspergillus niger* CFR-W-105, from which the compound of investigation is derived, has been deposited with the Microbial Type Culture Collection (MTCC) in Chandigarh, India, and has been added to its permanent collection under its accession code MTCC 5116.
